

ALTERNATIVE DISPUTE RESOLUTION FOR FINTECH

18 Sep 2019 (Wednesday) | 6:00PM - 9:30PM
Asian International Arbitration Centre (AIAC)

Technological developments in the area of Fintech are on the rise, bringing advancements and innovation to the provision of financial services in today's market. Our global financial services industry is increasingly connected as technology allows for constant interaction between multiple parties across the world. As interactions surge, so does the possibility of conflict.

This session explores Alternative Dispute Resolution (ADR) as a means to resolve Fintech disputes without the need for court litigation, and its feasibility in helping parties preserve business relationships while achieving time and cost efficient resolution to Fintech disputes.

Join our expert panelists from the World Intellectual Property Organization (WIPO) Arbitration & Mediation Center, Asian International Arbitration Centre (AIAC), Fintech Association of Malaysia (FAOM) and Chung Chambers in the discussion on how Alternative Dispute Resolution can help Fintech industry stakeholders resolve disputes without having to resort to litigation in court.
